PIANISTISCHE MINIATUREN Works by female composers Viviane Goergen – piano	ARS38559	PC: 01Q
	1 CD	2017

When female composers created their many piano miniatures in the 19th and early 20th centuries, it was not because they were unable to express themselves in larger forms. Rather, it was one of the few genres to be granted to them by their male competitors. But they knew how to make a virtue out of necessity, as **Viviane Goergen** impressively shows here.
